PROFESSIONAL SUMMARY

I am a Computer Engineering student with a hunger to learn and optate to explore that I ken. I have worked in Python frameworks like Django and Flask. I have developed a site for my college major project through Django and currently working on a site in the flask. I have studied HTML, CSS, Javascript, and done projects in each of my adeptness sets mentioned above. Some of my work are uploaded in GitHub(<https://github.com/SujanSharma07>) and many are yet to upload. I accept, I may not have formal experience but I can assure you I can be auxiliary if you integrate me in your project. It will be a minuscule push to, to be launching rocket. I can be a rocket that is stooped inland just because of the absence of starting momentum. I hope you will provide that momentum to my carrier.

EDUCATION

Present:	Bachelor of Science: Computer Engineering Advanced College of Engineering and Management - Kathmandu, Bagmati Pradesh
Oct. 2016:	High School Diploma: Science Global Collegiate School - pokhara, Gandaki Pradesh
